WEEKLY REPORT

Week Ending
April 8, 1967

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PUBLIC HEALTH SERVICE

BUREAU OF DISEASE PREVENTION AND ENVIRONMENTAL CONTROL

CURRENT TRENDS MEASLES - 1967

The steady incidence of measles cases continues around 2,500 per week, a trend which began early in February (Figure 1). For the 14th week (ending April 8), 2,559 cases were reported; 41.3 percent of this total was notified from Texas (730), California (180), and Washington (146).

Figures 2, 3, and 4 show the epidemiologic curves of reported measles cases from 1962 through the 12th week of 1967 for the West South Central, Mountain, and Pacific Regions of the United States and for the individual states within these regions. The trends of measles in the West South Central (Figure 2) and Pacific (Figure 4) Regions do not differ from those observed previously in other regions. In Oklahoma, Arkansas, Oregon, and Washington, the 1967 measles rates exceed their 1966 rates. There appears to be a consistent downward trend in incidence in the Mountain Region (Figure 3), but this is actually due

to variation in the patterns of measles within the states of this region. The curves for the individual states show that peak incidence occurred in several states in 1962 and 1963, in one state in 1964, and in another single state in 1965. It is of interest to note that Nevada is the only state in the Mountain Region with a higher rate in 1967 than in 1966. In none of the states in any of the three regions, however, do the rates for the current epidemiologic year approach the rates of their previous epidemic years, although an epidemic year might have been expected to occur in 1967 in several of these states. (Reported by the Childhood Viral Diseases Unit, Epidemiology Program, NCDC.)

INTERNATIONAL NOTES
SMALLPOX - Europe and India

As of April 12, 1967, no secondary cases have occurred among contacts of the three smallpox cases imported into Germany and Czechoslovakia (MMWR, Vol. 16, Nos. 10-13). None of the 15 individuals who came to the U.S. and who had contact with the Hanover, Germany, imported case developed any signs or symptoms suggestive of smallpox infection.

Through March 25 (first 12 weeks of 1967), the World Health Organization received notification of a total of 7,993 smallpox cases as compared with 4,033 cases during the comparable period in 1966. A continuing increase is evident in Bombay (Figure 5); 168 cases were reported for the week ending April 1.

SOURCE: WHO WEEKLY EPIDEMIOLOGICAL RECORD

SUSPECTED SMALLPOX - Hawaii

Further laboratory tests on the suspected case of smallpox in Honolulu, Hawaii (MMWR, Vol. 16, No. 13) have failed to confirm this diagnosis. Specimens sent to the National Communicable Disease Center for examination were negative by electronmicroscopy and agar gel tests; cultures in embryonated eggs were negative on first passage.

(Reported by the Laboratory Improvement Program, NCDC.)

ERRATUM: Vol. 16, No. 12, p. 94:

In Table 1, the column labelled "Vaccination History" should read:

Import No. 1	Childhood
	? revacc. 1965
Import No. 2	Revacc. 1967
	? success

THE MORBIDITY AND MORTALITY WEEKLY REPORT, WITH A CIRCULATION OF 17,000, IS PUBLISHED AT THE NATIONAL COMMUNICABLE DISEASE CENTER, ATLANTA, GEORGIA.

DIRECTOR, NATIONAL COMMUNICABLE DISEASE CENTER
 DAVID J. SENCER, M.D.
 CHIEF, EPIDEMIOLOGY PROGRAM
 A.D. LANGMUIR, M.D.
 ACTING CHIEF, STATISTICS SECTION
 IDA L. SHERMAN, M.S.

IN ADDITION TO THE ESTABLISHED PROCEDURES FOR REPORTING MORBIDITY AND MORTALITY, THE NATIONAL COMMUNICABLE DISEASE CENTER WELCOMES ACCOUNTS OF INTERESTING OUTBREAKS OR CASE INVESTIGATIONS WHICH ARE OF CURRENT INTEREST TO HEALTH OFFICIALS AND WHICH ARE DIRECTLY RELATED TO THE CONTROL OF COMMUNICABLE DISEASES. SUCH COMMUNICATIONS SHOULD BE ADDRESSED TO:

THE EDITOR
 MORBIDITY AND MORTALITY WEEKLY REPORT
 NATIONAL COMMUNICABLE DISEASE CENTER
 ATLANTA, GEORGIA 30333

NOTE: THE DATA IN THIS REPORT ARE PROVISIONAL AND ARE BASED ON WEEKLY TELEGRAMS TO THE NCDC BY THE INDIVIDUAL STATE HEALTH DEPARTMENTS. THE REPORTING WEEK CONCLUDES ON SATURDAY; COMPILED DATA ON A NATIONAL BASIS ARE RELEASED ON THE SUCCEEDING FRIDAY.
